SUMMARY

I am a motivated and detail-oriented Cybersecurity undergraduate with a passion for securing modern applications and infrastructure. Through academic and personal projects I have gained hands-on experience in secure coding and web technologies such as JavaScript, React.js, and Node.js, along with backend work in MongoDB, Kotlin, and basic SQL. My coursework and lab work have strengthened my foundation in network security, threat modeling, vulnerability assessment, and incident response. A quick learner who eagerly explores new tools and keeps abreast of emerging threats, I am dedicated to writing clean, maintainable code while applying robust security best practices. I thrive on solving real-world problems with innovative, resilient solutions and am seeking opportunities to grow as a security-minded developer and contribute meaningfully to tech-driven projects.

EDUCATION

- BSc (Hons) in Cybersecurity** (2023-2027)
SLTC Research University
- G.C.E A/L Examination** (2022)
Passed with 3S in Technology Stream

PROJECTS

Neurocloud - (Mood Tracking App and Website)

- Neurocloud is a full-stack application built with Kotlin, Next.js, Node.js, and MongoDB, designed to track user moods with secure data handling, responsive UI, and efficient frontend & backend integration

Findit - (Lost and Found Management System)

- Built a secure lost and found web app using React.js, Node.js, and MySQL with user authentication and data handling.

Neuronix- (Learning Platform - Only Design)

- Designed UI/UX for a sign language detection and learning platform using Figma.

COURSES

- Introduction to Cybersecurity - (Cisco Networking Academy)
- Introduction to Cybersecurity Awareness - (Hp Life)
- Data Science & Analytics - (Hp Life)
- Fundamentals of digital marketing -(Google Digital Garage)

EVENT PARTICIPATION

- Participated for Cybercon Workshop (2024) at SLTC premises
- Participated for CodeMania 5.0 (2025) at SLTC premises

TECHNICAL SKILLS

Languages

- JavaScript
- Python
- Kotlin
- C++ (Basic)

Frameworks & Libraries

- React.js
- Next.js
- Node.js
- Express.js

Frontend

- HTML / CSS
- JavaScript / React.js

Operating Systems

- Linux (Kali, CentOS)
- Windows
- macOS

Networking & Security

- Networking Fundamentals
- Network Protocols
- Basic Network Security Concepts

Cybersecurity Skills

- Network Security Fundamentals
- Threat Modeling
- Vulnerability Assessment
- Incident Response Basics
- Secure Coding Practices
- Basic Web Application Security (OWASP concepts)
